SUMMARY

Full Stack & AI Engineer with experience building scalable SaaS platforms, AI agents, and LLM-powered automation systems for international startups. Experienced in backend systems, AI integrations, and end-to-end application development. Delivered production-grade AI solutions including automation platforms, CRM systems, and intelligent interview and communication tools.

WORK EXPERIENCE

AI Engineer & back end Developer

Agents4Hire | Remote, USA

Jan 2025- 2026 May

- Developed scalable AI-powered backend systems, intelligent automation workflows, and LLM-integrated applications for startup clients.
- Built secure APIs, AI agents, workflow orchestration systems, and automation pipelines for production environments.
- Delivered AI-driven systems focused on automation, communication workflows, and multi-model AI integrations.

Key Projects

AlphaMail AI

Jan 2025- 2025 Dec

- Built an AI-powered email automation system that fully automates business communication workflows using intelligent agents.
- Developed automated email generation, response handling, and workflow orchestration systems.
- Improved queue processing, system scalability, and automation reliability.
- Designed secure AI-driven communication pipelines for production use.

GenAI

Jan 2026- 2026 May

- Built a multi-model AI platform integrating leading AI systems for text, code, image, music, and video generation.
- Developed backend orchestration for routing between multiple AI models and optimizing outputs.
- Implemented integrations for document, spreadsheet, and presentation generation workflows.
- Improved structured output handling and AI response consistency.

Full Stack & AI/ML Developer

AI Syncso CRM SaaS | Remote, Qatar

Jan 2026- 2026 May

- Developed an AI-powered CRM SaaS platform with automation and intelligent customer interaction systems.
- Built AI voice agents, WhatsApp agents, and website chat agents for business automation.
- Enabled customer interaction features such as chat, voice, scheduling, ordering, and support automation.
- Implemented embeddable chatbot systems with API authentication for external websites.
- Integrated CRM systems with HubSpot and Odoo.
- Worked on automation pipelines, scraping systems, and customer data workflows.

Full Stack & AI/ML Developer

Sapien AI | Remote, Kenya

Feb 2025- 2026 Jan

- Contributed to an AI-powered interview platform supporting video, voice, and chat-based interviews.
- Built AI-driven candidate evaluation system with automated scoring and feedback generation.
- Worked on ML model integration, frontend development, and interview workflow automation.

Full Stack Developer

NileSync | Remote

Feb 2025– 2026 Apr

- Developed scalable education and enterprise web systems.
- Contributed to Kelem Quiz, a school management system for student tracking, parents, exams, grading, and academic reporting.
- Built full-stack features for academic management and reporting systems.
- Worked in distributed agile teams on production education platforms.

Machine Learning Data Annotation – Amharic OCR AI Data Specialist (Contract) | Meta AI Project (via RWS)

Jan 2026– 2026

- Annotated and validated OCR-extracted Amharic text to enhance machine learning model accuracy.
- Performed linguistic corrections and quality checks on 1,500+ annotation tasks within strict deadlines.
- Delivered high-quality training data to support Meta AI’s computer vision and NLP systems.
- Utilized SRT HALO tool for annotation workflows, project tracking, and compliance with security standards.

AI Model Trainer & Code Evaluation Specialist Revelo | Freelance

Jan 2026 – Present

- Worked on AI model training and evaluation focused on code understanding and response quality.
- Performed code refactoring, bug fixing, and AI-generated code review tasks.
- Evaluated structured outputs, function calling, and model performance.
- Improved AI reasoning accuracy and developer-focused AI systems.

TECHNICAL SKILLS

- | | | |
|--------------|----------|--------------------|
| • JavaScript | • Python | • Go |
| • Typescript | • Java | • Vector Databases |
| • React | • Rust | • C++ |

EDUCATION

Bachelor of Science in Computer Science

- Unity Universtiry | 2021-2026

CERTIFICATIONS

- Software Engineering
- Back-End Development
- Machine Learning
- Foundation Leadership

HACKATHONS & ACHIEVEMENTS

HARVARD HEALTH INNOVATION HACKATHON (HSIL) – 2026

TEAM WINNER | ETHIOPIA HUB WINNER | GLOBAL TOP 50 FINALIST (ONGOING SELECTION)

- Built an AI-powered health system focused on early disease prevention and virus detection (including COVID-19 and similar infectious diseases).
- Developed an intelligent AI health monitoring concept using data-driven prediction and detection systems.
- Won Ethiopian Hub regional competition and represented Ethiopia at the global stage.
- Selected among Top 50 teams globally out of 3000+ ideas (competition still ongoing).
- Worked in a collaborative innovation team focused on real-world healthcare AI solutions.
